

BENEFITS OF TECHNOLOGY

Technology has a number of positive benefits for student learning such as:

- Assists in promoting active participation.
- Inclusive of different learning styles.
- Improves collaboration
- Prepares child for the future (developing students 21st Century skills).
- Reinforces learning through multimodal modes.

Students are excited, enthused and highly engaged when using digital technologies such as iPads.

TECHNOLOGIES

TECHNOLOGY @ TREENDALE PRIMARY SCHOOL

The highly skilled and committed educators at Treendale PS provide students with daily opportunities to engage with powerful digital learning tools allowing them to create, collaborate, communicate and discover.

Teachers are harnessing the enthusiasm and eagerness of students by providing learning opportunities driven by the Australian Curriculum while integrating technology into learning experiences. . Students are using the devices to search, create, produce, celebrate, demonstrate and reinforce their learning.

CREATING 21ST CENTURY LEARNERS

BRING YOUR OWN DEVICE PROGRAM (BYOD)

The use of iPads across learning areas allows students increased accessibility to instant and global information, students are able to embrace technology and improve their information and communications technology abilities.

The BOYD program ensures students are able to have a 1:1 ratio of iPads and allows students to get the most out of their learning, implementing a BOYD program is also a more sustainable approach.

Students are responsible for their own device during school hours which is reinforced throughout the school with the iPad iPromise. This allows students to be responsible for their learning.
